Niagara 4 - Certification Course

Access our Niagara 4 virtual classes in English or French across Canada and the USA.

Training Overview:

Over the course of the 5-day Niagara 4 Technical Certification program, students will achieve a basic level of technical expertise to effectively design, build and program projects using the Niagara 4 platform. Students must take and pass an exam at the end of the training to receive their official Tridium certificate, a formal, industry-recognized document of their abilities. This practical exam will be given on Friday and students will receive their certification exam results within 14 days by email.

Details :

Once your payment has been made and your place in the class confirmed, you will receive a confirmation email including instructions on how to download the Niagara 4 Workbench software, as well as a temporary license to use the course. If you already have a licensed version of Niagara 4 Workbench, you do not need to obtain another one. You will also receive instructions on how to create an account on TridiumUniversity.com.

Prerequisite:

Each student must bring a Windows 7/8/10 laptop (PC), already equipped with the licensed copy of Niagara 4 Workbench 4.7.xx. as previously downloaded. You must have administrator privileges on your laptop, have an Internet browser and a recent version of Java and be able to connect to the Internet without restriction. You must also have access to your firewall settings.
