

BELIMO 101

Belimo 101 is a 1-day workshop that provides valuable hands-on training and instruction to those working with Belimo actuators, valves, and sensors. Topics include how to wire an actuator, calculate the Cv rating for a valve, and the importance of sensors in an HVAC system introduction to air dampers and valves.

Duration 1 day in class presentation from 8 a.m. to 4 p.m.

Continental breakfast will be served at 7:30 a.m. Lunch will be served in class.
