

BELIMO – OPERA – GAS DETECTION TRAINING

OVERVIEW

This is our new 1/2-day **Level Two** training session is designed to provide valuable hands-on training and instruction to those working with Belimo Gas Monitoring systems.

This in-person, instructor led session, will cover the installation, setup/configuration, startup of the Belimo Gas Monitoring system. Technicians attending, will be provided with an in-depth product review, including installation practices, monitoring/control applications & networking configurations. This training is conducted without actual Gas Calibration, but we will go through all the required steps.

Equipment, tools, and training materials will all be provided during this class; all you need to do is show up! A personalized factory-authorized training certificate will be provided through our Belimo University upon completion.

ADDITIONAL INFORMATION

Duration 1/2 day in class presentation from **8:30 a.m. to 1 p.m.**

Lunch will be served in class.
